

```
const checkbox = document.querySelector('.my-form input[type="checkbox"]');  
const btns = document.querySelectorAll(".my-form button");  
checkbox.addEventListener("change", function() {  
  const checked = this.checked;  
  for (const btn of btns) {  
    checked ? (btn.disabled = false) : (btn.disabled = true);  
  }  
});
```
